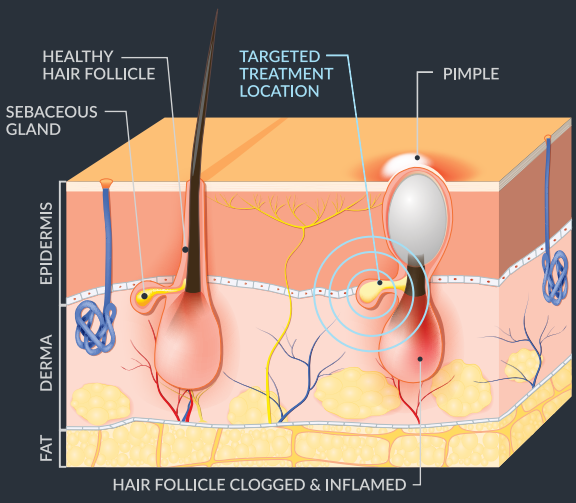
AGNES RF

SAY GOODBYE TO ACNE WITHOUT THE HARSH CHEMICALS OR MEDICATIONS.

+ Address acne where it starts
+ Precision targeting
+ Safe for all skin types

HOW IT WORKS:

Our innovative treatment uses a technique called Selective Sebaceous Gland Destruction. The focused radio frequency (RF) safely targets and destroys the individual sebaceous glands that cause acne. Once the gland is destroyed, it will no longer cause acne.



LONG-TERM RESULTS

Treatments should clear existing acne and also prevent future breakouts.
