

SCARLET

SRF

A REVOLUTIONARY SOLUTION FOR SAFE SHORT RADIO FREQUENCY SKIN TREATMENTS

Scarlet SRF is the safest treatment in the field of RF systems, with absolutely no down time and no side effects. It targets virtually any skin issue. Clients are good to go immediately after treatment; there is no bleeding or sensitivity as experienced with other microneedle treatments.

Developed by the researcher behind the Na Effect, Scarlet SRF is the first and original fractional microneedling RF treatment using the phenomenon of alternating bipolar signal energy. First published in Scientific Reports, a journal of the Nature Publishing Group, the technology behind the Scarlet SRF is guaranteed safe and is FDA approved. The Scarlet SRF is patented not only in America, but in 70 other countries, in Europe, Asia, Middle East, Oceania, and South America.

THE TRUE, NATURAL, NON-SURGICAL FACE LIFT

Scalp skin tightening is a treatment unique to the Scarlet SRF; no other machine can achieve its same effect. This painless procedure allows for patients to undergo the whole process without numbing cream, all of which is finished in just ten minutes. Three hours after the procedure, patients are able to wash their hair as normal, and their scalp will be fully restored to its original youthful state.

- FDA Cleared
