

DÉJÀ VU MED SPA

Laser Genesis Pre and Post Care

Pre- treatment

- Avoid tweezing or waxing at least 4 weeks prior to treatment.
- Avoid sun exposure at least 2 weeks prior to treatment.
- Reschedule your appointment if you have any active infections such as cold sores.
- Avoid retinol products at least 2 weeks before your treatment.
- On your appointment day, do not apply any lotion or cream to treatment area (except sunscreen to face).

Post- treatment

- Sunscreen may be applied before you leave the office.
- Wear sunscreen to treated area throughout the course of your treatment.
- Avoid sun exposure for at least 7 days.
- You may take Tylenol as needed for discomfort or apply ice.
- A post procedure moisturizer and sunscreen is recommended and available for purchase.

What to expect

- The general condition of the skin (elasticity, tonicity) should improve as well as fine lines and wrinkles.
- Results will not become visible before the third treatment
- Treatments are provided at 1- 4 week intervals depending on skin condition.
- The clinical result, as well as the optimal number of treatments, varies from one individual to another.
- A maintenance treatment may be needed to maintain the improvement.
